

# Bank account kata

## Requirements

- Deposit and Withdrawal
- Account statement (date, amount, balance)
- Statement printing

The expected result is a domain implementation that meets the expressed needs. Don't build an entire app, especially no UI, no persistence.

## User Stories

US 1:

In order to save money as a bank client I want to make a deposit in my account

US 2:

In order to retrieve some or all of my savings as a bank client I want to make a withdrawal from my account

US 3:

In order to check my operations as a bank client I want to see the history (operation, date, amount, balance) of my operations

## Constraint

No framework (only test framework and maven are allowed).

## Usage

`mvn test`
